PROFESSIONAL SUMMARY

C++ Software Engineer with 4+ years of experience building and testing performance-critical, large-scale enterprise applications on Windows and Linux, including medical imaging software for Canon Medical Systems. Strong background in Object-Oriented Programming, multithreading, memory management, and debugging/profiling native code, with end-to-end ownership across the Software Development Life Cycle (SDLC). Experienced in Agile teams, unit and automation testing (GTest), and root-cause analysis using static and dynamic code analysis and code coverage. Took a six-month temporary relocation to Dubai for family reasons and have now returned to Kerala, India, where I am actively seeking opportunities to continue my career in C++ software development.

CORE TECHNICAL SKILLS

Languages: Modern C++ (**C++11/14/17/20**), Python, Java (strong basics), C#(strong basics)

C++ Engineering: Object-Oriented Programming, Multithreading & Concurrency, Memory Management, Synchronization techniques, STL, Data Structures & Algorithms, Kafka

Debugging & Performance: GDB, Valgrind, Coverity Static Analysis, Root Cause Analysis, Performance Profiling, Defect Reduction, Code Reviews

Testing & Quality: Unit Testing (GTest), Automation Testing, Regression Testing, SDLC Ownership

Platforms & Tools: Windows, Linux, Git, GitHub, SVN, Docker, CI/CD Pipelines, JIRA, Redmine, GitHub Copilot, Cursor and Claude

Practices: Agile/Scrum, Waterfall, Cross-Functional Collaboration, Technical Documentation, Mentoring

Additional: Django, REST APIs, JavaScript/TypeScript, React.js exposure, SQL, NoSQL Databases, MongoDB, PostgreSQL

WORK EXPERIENCE

Software Engineer
Sep 2025 – Feb 2026

Trenser Technology Solutions Pvt Ltd — Trivandrum, India

- Engineered high-performance, maintainable C++ application features using Object-Oriented Programming, Multithreading & Concurrency, Memory Management, Synchronization techniques, STL, and modern C++ practices, ensuring high code quality and maintainability contributing to a modular codebase used by enterprise medical imaging clients.
- Designed, implemented, and debugged software features on Linux and Windows environments, performing root-cause analysis and defect resolution for production issues.

Software Engineer
Jun 2022 – Sep 2025

Quest Global Engineering Services Pvt Ltd — Trivandrum, India

- Developed and tested native **C++** features for Canon Medical Systems' MRI scanning software, supporting critical diagnostic hardware deployed in clinical environments worldwide.
- Design, develop, test, and maintain enterprise software components using modern C++ (C17/C20), with focus on memory safety, performance, concurrency and reliability
- Debugged complex memory-ownership and concurrency issues using static and dynamic code analysis and code coverage to ensuring production-level stability of a large-scale native application.
- Built Python automation and testing utilities that reduced manual regression verification effort, improving release velocity.
- Collaborated in an Agile team to troubleshoot, profile, and optimize application performance across builds.
- Received the On the Fly Award twice (May 2023 & Dec 2024) for high-quality delivery on critical international project modules.

Python Developer
Aug 2021 – Feb 2022

Infox Technologies — Kochi, India

- Developed and maintained full-stack web applications using Python, Django, HTML5, CSS3, and Bootstrap.
- Built desktop GUI applications using Python's Tkinter library for internal utilities and tools.
- Onboarded and mentored incoming developers on Python and Django fundamentals and best practices.

ACHIEVEMENTS

ON-THE -FLY AWARDS **(***May 2023 & Dec 2024),* TEAM BUILDER AWARD | *QUEST GLOBAL*

EDUCATION

Bachelor of Engineering in Electronics and Communication

Ilahia School of Science and Technology, APJ Abdul Kalam Technological University | 2016 – 2020 | Kerala, India

LANGUAGES

English, Tamil, Malayalam, Hindi
