

HARIPRIYA M A

C++ Developer | Software Engineer

haripriyaajai99@gmail.com | Dubai, UAE | Residence Visa

+971 556452806 | <https://www.linkedin.com/in/haripriya-m-a-4b9a151b2/>

PROFESSIONAL SUMMARY

C++ Software Engineer with 4+ years of experience developing and testing performance-critical, enterprise-grade applications, including medical imaging software for clinical/diagnostic hardware. Strong in object-oriented design, multithreading, memory management, and debugging (Coverity, Valgrind). Experienced across the full SDLC - requirements, design, development, testing, and production support - in Agile teams. **Seeking a C++ Developer / Software Engineer role in the UAE.**

CORE SKILLS

- Languages: C++ (Linux, Windows), Python, Java
- C++ Engineering: OOP, Design Patterns, Multithreading, Memory Management, STL, DSA, Unit Testing (GTest)
- Debugging & Quality: Coverity Static Analysis, Valgrind, Root Cause Analysis, Code Reviews
- APIs & Scripting: REST API Development, Python Automation, Shell Scripting
- Tools: Docker, Git, GitHub, SVN, JIRA, Redmine, CI/CD
- Practices: Agile/Scrum, Waterfall, Technical Documentation, SDLC Ownership

PROFESSIONAL EXPERIENCE

Software Engineer

Trenser Technology Solutions (P) Ltd | 09/2025 - 02/2026 | Trivandrum, India

- Engineered high-performance, maintainable applications using object-oriented design principles across a team, contributing to a modular codebase used by enterprise medical imaging clients.
- Gained exposure to JavaScript, TypeScript, and React.js, building UI modules for the same enterprise medical imaging platform, which strengthened cross-stack collaboration with frontend teams.

Software Engineer

Quest Global Engineering Services Private Limited | 06/2022 - 09/2025 | Trivandrum, India

- Developed and tested features for Canon Medical Systems MRI scanning software in C++, supporting critical diagnostic hardware used in clinical environments globally.
- Owned full SDLC - requirements analysis, technical design, development, testing, deployment, and production support.
- Reduced application defect rates by approximately 20-25% through systematic debugging, root cause analysis, and Coverity static code analysis.
- Built Python automation and testing utilities, reducing manual regression verification effort.
- Architected a C++ producer-consumer streaming framework (StreamHub) for high-throughput binary data transfer using async chunk transfer and memory pooling, eliminating malloc/free overhead via a pre-allocated buffer pool.
- Debugged complex memory ownership issues using Valgrind, ensuring production-level stability.
- Received the On The Fly Award twice (May 2023 & Dec 2024) for high-quality delivery on critical international project modules.

IT Support Engineer

Infex Technologies | 06/2021 - 05/2022 | Kochi, India

- Diagnosed and resolved software/hardware/network issues, resolving 90%+ of incidents within agreed SLA timelines.
- Logged, tracked, and resolved issues using ticketing systems; performed root cause analysis to reduce recurring incidents.

EDUCATION

Bachelor of Engineering in Electronics and Communication

Ilahia School of Science and Technology, APJ Abdul Kalam Technological University | 2016 - 2020 | Kerala, India

LANGUAGES

English, Tamil, Malayalam, Hindi
